

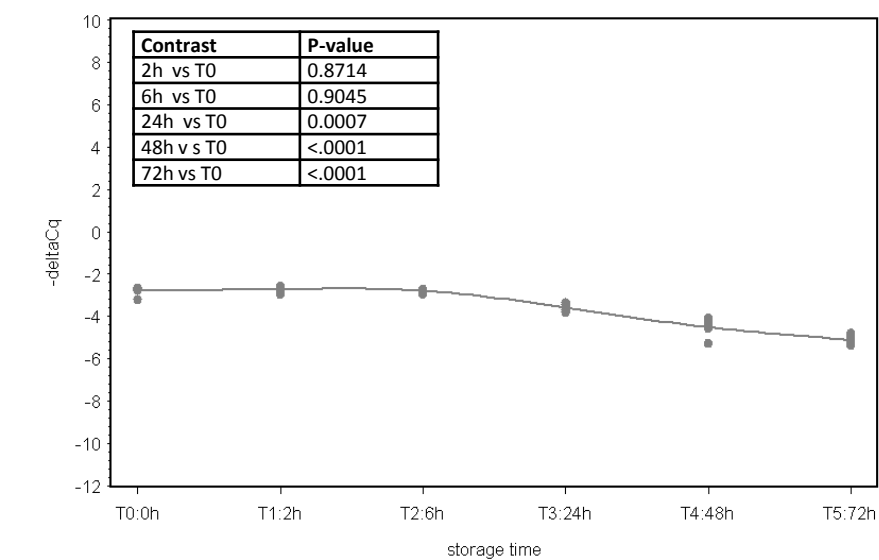

Figure S3. Pre-validation of down-regulated EDTA biomarkers.

The figure reports the distributions over time of the $-DeltaCq$ of down-regulated markers in six EDTA samples. Where $DeltaCq = (Cq_{biomarker} - Cq_{mref})$ and Cq_{mref} is the mean of the Cq values of the 3 reference genes. In the tables are reported the p-value of the contrast implemented in the ANOVA mixed model.

A: ATP2B short

B: TNFRS short
